

PLAN/GEOG 450
T & TH 4:00-5:20PM, EV2 2002
Changing Form and Structure of Metropolitan Canada

Calendar Description

Selected analysis of processes, problems and planning issues associated with the internal growth and spatial reorganization of Canadian metropolitan areas. Three or four topics are chosen for detailed investigation. These will vary from year to year.

Prerequisites: One of GEOG 250, GEOG/PLAN 349, PLAN 362

Course Introduction

More than half of the world's population lives in cities, and in Canada the share is even larger. To realize the opportunities associated with urbanization and respond to the challenges, it is necessary to gain a better understanding of the changes in the internal structure and form of cities, and the factors shaping them. The focus of this course is on three specific areas of change in Canadian cities: the social structure, suburbanization and urban sustainability.

Canadian cities have undergone dramatic change in the past twenty to thirty years: Immigration, globalization, the aging of the population, declining household size, continuing suburban sprawl, decline in manufacturing and growth in the new economy and service sectors. Policy-makers are confronted with an increasing complex set of issues related to these changes, which materialize in shifts in the social and physical structure of cities. For instance, immigration has promoted new approaches to multicultural planning, suburbanization has contributed to growing transportation and environmental issues, and growing income inequality and diversity of household types and sizes produce new challenges in local housing and labour markets.

How can policy-makers help accommodate an increasingly diverse population with adequate and affordable housing? How can a growing suburban population be served with transit and abilities to walk and cycle to work, school or shopping? What are the implications of income inequality for housing markets? This course considers these and other such complex questions by studying the relationship between present-day societal changes and the physical and the social structure of Canadian cities.

Course Objectives

The course deals with issues of direct relevance to public policy through the lens of the academic research in planning, urban studies and economic geography. Although specific policies are considered, the focus of the course is on the societal and structural changes in Canadian cities to build students' knowledge for informed, evidence-based decision-making. Upon completion of the course, students should be able to:

- Explain dominant changes in the form and structure of Canadian cities and their socio-economic and planning policy implications

- Understand the relationship between the spatial changes and the socio-economic restructuring occurring in cities
- Reflect critically on the empirical and theoretical basis of the research documenting change in Canadian cities
- Systematically analyze, synthesize and communicate information and data to inform public policy and planning

Learning Modes

The course consists of two weekly lectures. The lectures are context setting and build on and complement the assigned readings. Lectures also include interactive learning activities, audio-visual content and guest speakers. Students will participate in class discussions, present readings and write a research paper.

Readings

The readings are a core component of the course and should be completed before attending class. Readings are selected from academic articles, books, newspapers and sources from the Internet. Readings are available on-line on eReserves (see 'LEARN' for links). Additional or substitute readings may be suggested throughout the term at the instructor's discretion. Supplementary (optional) texts:

Bunting, T., Filion, P., & Walker, R. (Eds.) (2010). *Canadian cities in transition: New directions in the twenty-first century* (Fourth edition). Don Mills, ON: Oxford University Press.

Bourne, L., Hutton, T., Shearmur, R., & Simmons, J. (Eds.) (2011). *Canadian urban regions: Trajectories of growth and change*. Don Mills, ON: Oxford University Press.

Class Time and Office Hours

The class meets twice each week on Tuesdays and Thursdays in EV2 2002. Please turn off electronic devices that may distract other students. To make the most out of the seminars, use the time to listen and absorb material presented by your instructor, guest lectures and fellow students. The instructor holds office hours weekly on Thursdays (Noon-2PM) or by appointment.

Student Evaluation

The instructor and the teaching assistant under the supervision of the instructor grade students. Students must complete and pass each component of the course to receive a final passing grade. The instructor also considers individual student achievement and unforeseen circumstances to determine final grades. Students are evaluated as follows:

PARTICIPATION/ATTENDANCE – 10%

PRESENTATION OF READINGS – 10%

RESEARCH PROJECT OVERVIEW – 10% (FEBRUARY 8)

FINAL RESEARCH PROJECT – 40% (APRIL 5)

IN-CLASS QUIZZES – 30% (JANUARY 24; FEBRUARY 14; MARCH 14; APRIL 4)

Participation is evaluated based on the quality of students' contributions in class. Students are evaluated based on their regular attendance, being on time, attentiveness in class, verbal communication skills and participation in class activities that demonstrates understanding of assigned readings, synthesis of course material and critical evaluation of content. Please notify the instructor before class if you will be absent.

Students must complete all research and writing for the research project on their own. The purpose of the research paper is for students to delve more deeply into an aspect of the course they find most interesting. The presentation is to be conducted as a group. All group members are to collaborate in a mutually respectful manner. It is every student's responsibility to fully contribute to the group and to ensure fair distribution of work. Do not collaborate with other groups. All sources and ideas must be cited in all written assignments and the presentation. All written components are to be typewritten. Further information on the evaluative components will be distributed in the first week of the course.

Assignments are due at 11:59PM on the due date. Assignments are to be submitted electronically on 'LEARN'. Assignments received after midnight are considered late and incur a **late penalty of 5% per day**. Graded assignments will be returned to students electronically. Students need to write all four quizzes but only the three quizzes with the highest grades count toward the final grade.

Communication

'LEARN' will be used for communication outside of lectures. Course materials will be available on 'LEARN'. Students are responsible to check their UW email and 'LEARN' accounts regularly. Indicate the course number (PLAN/GEOG 450) in the subject line in all email communication. An effort will be made to deal with email requests within two business days of receipt. Questions regarding the course material are usually most efficiently and effectively dealt with in person rather than using email.

Referencing and Citation

The School of Planning uses the APA (American Psychological Association) citation style as a standard referencing system. The APA style is described in the *Publication Manual of the American Psychological Association* (call number BF76.7.P83 2001). You can find APA guidelines on the web (e.g., University of Guelph: www.lib.uoguelph.ca/assistance/writing_services/components/documents/APA.pdf).

Academic Integrity

In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility. www.uwaterloo.ca/academicintegrity/ Students who are unsure what constitutes an academic offence are requested to visit the on-line tutorial at www.lib.uwaterloo.ca/ait

Turnitin

Plagiarism detection software (Turnitin) will be used to screen assignments in this course. This is being done to verify that use of all materials and sources in assignments is documented. Students will be given an option if they do not want to have their assignment screened by Turnitin. In the first week of the term, details will be provided about arrangements and alternatives for the use of Turnitin in this course.

Consequences of Academic Offences

A student is expected to know what constitutes academic integrity, to avoid committing academic offenses, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offense, or who needs help in learning how to avoid offenses (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. When misconduct has been found to have occurred, disciplinary penalties will be imposed under Policy 71 – Student Discipline. For information on categories of offenses and types of penalties, students should refer to Policy 71 - Student Discipline, <http://www.adm.uwaterloo.ca/infosec/Policies/policy71.htm>

Within ENV, those committing academic offences (e.g. cheating, plagiarism) will be placed on disciplinary probation and will be subject to penalties which may include a grade of 0 on affected course elements, 0 on the course, suspension, and expulsion.

Students who believe that they have been wrongfully or unjustly penalized have the right to grieve; refer to Policy #70, Student Grievance, <http://www.adm.uwaterloo.ca/infosec/Policies/policy70.htm>

ENV students are strongly encouraged to review the material provided by the university's Academic Integrity office (see: <http://uwaterloo.ca/academicintegrity/Students/index.html>).

Unforeseen Circumstances

Requests for extensions must be discussed in person with the instructor before the due date or as soon as possible. Official documentation is required for extensions or alternate grading arrangements on medical grounds. Extensions will not be granted to accommodate travel plans or other recreational activities.

University can be a very stressful time for various reasons. If you are having difficulty coping with things do come talk to me or contact Counseling Services at 519-888-4567 x32655 or www.adm.uwaterloo.ca/infosec/about/index.html For emergencies, contact the mobile crisis team (available 24 hrs/day) at 519-744-1813 or UW police at 519-888-4911.

Note for Students with Disabilities

The Office for Persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

Religious Observances

Please inform the instructor at the beginning of term if special accommodation is needed for religious observances that are not otherwise accounted for in the scheduling of classes and assignments.

Research Ethics

Please also note that the University of Waterloo requires all research conducted by its students, staff, and faculty which involves humans as participants to undergo prior ethics review and clearance through the Director, Office of Human Research and Animal Care (Office). The ethics review and clearance processes are intended to ensure that projects comply with the Office's Guidelines for Research with Human Participants (Guidelines) as well as those of provincial and federal agencies, and that the safety, rights and welfare of participants are adequately protected. The Guidelines inform researchers about ethical issues and procedures which are of concern when conducting research with humans (e.g. confidentiality, risks and benefits, informed consent process, etc.). If the development of your research proposal consists of research that involves humans as participants, the please contact the course instructor for guidance and see <http://iris.uwaterloo.ca/ethics/>

Discipline

A student is expected to know what constitutes academic integrity, to avoid committing academic offence, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offense, or who needs help in learning how to avoid offenses (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. For information on categories of offences and types of penalties, students should refer to Policy 71, Student Discipline, www.adm.uwaterloo.ca/infosec/Policies/policy71.htm. For typical penalties, check Guidelines for Assessment of Penalties, www.adm.uwaterloo.ca/infosec/guidelines/penaltyguidelines.htm

Grievance

A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70 - Student Petitions and

Grievances, Section 4, www.adm.uwaterloo.ca/infosec/Policies/policy70.htm. When in doubt please contact your Undergraduate Advisor for details.

Appeals

A decision made or penalty imposed under Policy 70 - Student Petitions and Grievances (other than a petition) or Policy 71 – (Student Discipline) may be appealed if there is a ground. A student who believes he/she has a ground for an appeal should refer to Policy 72 (Student Appeals) www.adm.uwaterloo.ca/infosec/Policies/policy72.htm

Graded Assignments

Graded assignments are returned electronically on 'Learn'. It is the student's responsibility to view and download graded assignments from 'Learn' before on-line access to the course ends at the end of term. Graded quizzes are returned at lectures. Unclaimed quizzes will be retained for one month after grades become official in 'Quest'. After that time, they will be destroyed in compliance with UW's confidential shredding procedures.
